

Service information

Reference no.: GDA_96174

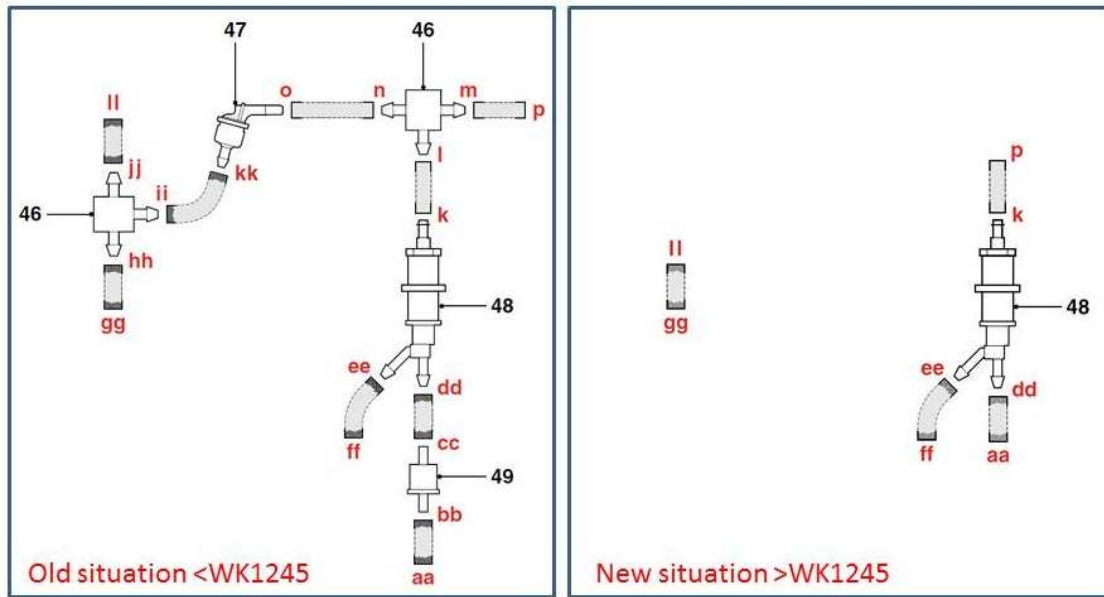

Symptom

Internal water and steam circuit changed

Cure

INFO:

From WK1245 onwards the water and steam circuit in Senseo Latte and Cappuccino Select appliances has changed. To reduce the complexity of the system some parts have been excluded, not affecting the performance of the appliance. In the new situation the appliance will not vent the steam system into the water container, the bypass valve (Pos. 44 in SLS, Pos. 48 in SCS) will connect directly to the valve outlet, next to the 3-way valve.

Senseo Latte Select removed:	Senseo Cappuccino Select removed:
<ul style="list-style-type: none"> • Pos. 42 T-piece (2x) • Pos. 43 Venting valve • Pos. 45 one-way valve 	<ul style="list-style-type: none"> • Pos. 46 T-piece (2x) • Pos. 47 Venting valve • Pos. 49 one-way valve

Please note that it is not allowed to modify the old situation to the new situation, as various hoses have been changed in length and position to assure no change in performance.

Appliances built according to the latest situation can be recognized by an increase of the Service Change Classification:

- All HD7853 appliances went **from /A to /B**
- HD7854/60 and HD7854/80 appliances went **from /B to /C** (EU)
- HD7854/84, /86 and /88 appliances went **from /A to /B** (Brazil & Argentina)
