Reference no.: GDA_97833

Symptom

Permanent filter and Spoon

Cure

INFO:

Per WK1306 both the permanent filter and (coffee measuring) spoon have been removed as standard accessories for the HD7751/00 and HD7753/00 Grind & Brew appliances. The removal of the measuring spoon is already implemented in the rest of the range of drip-filter coffee makers.

Only FEU counties will remain receiving the permanent filter, as the supply of paper filters is poor in that area.
