

Service information

Reference no.: GDA_98330

Symptom

Auto shut-off time 60 or 30 mins

Cure

INFO:

For the entire Senseo 2 family there is a default Auto shut-off time of 60 mins. This has always been the case, not 30 mins, as stated in the DFU. A change will be made, but it's hard to estimate when this will hit the market.

No stock is affected or wrong, No PCBA needs to be replaced because of this error in the DFU, there is no possibility to get 30 mins Auto shut-off time.
