Service information

Reference no.: SDA_102235

Symptom

Machine doesn't start anymore after software update.

Cure

INFO:
Machine doesn't start anymore after software update. It goes continuously in stand-by.

CURE:
Upload the new software V. 02.08.04.
In Detail:
• Fix the incorrect EEPROM initialization that cause the machine to stay continuously in stand-by.
• Fix the random wake up of the machine followed by a BU group movement and a self turning off of the machine.
• Create a new memory map to match the correct memory address with the correct information.
