

Service information

Reference no.: SDA_90501

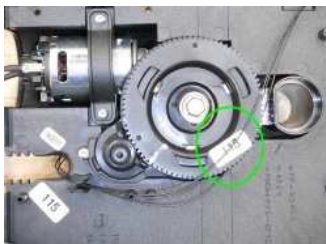

Symptom

To high dosing

Cure

INFO:
Coffee powder under the brewing group, coffee dose to high in Incanto de Luxe

CURE:
It is possible that the grinder adjustment of the dosing is too high. Please check in the test mode and at the grinder the dose adjustment pulses. If necessary correct it see the list. Table 1
After the correction check the dosing; this must be between 8-8,5gr in the medium dose.

test mode	label
0	90
1	105
2	115
3	130
4	>140
