Service information

Symptom

On Button doesn´t work.

Cure

INFO:
The Handblender HR161X Range do not work, while using the ON Button. The Turbo mode works without any issues.

CURE:
1) Changed bare wire length at the PCBA from 6,0+/-1mm to 4,5+/-1mm to avoid the wire tilting to soldering point an causing bridge soldering
2) Add picture (good and poor sample) on WI for contrast to sure the operator could identified the poor unit.

REMARKS:
Actions have been implemented from June 15th 2012 onwards.
