

**Service information**

**Reference no.: SDA\_95859**

**Symptom**

Boiler doesn't heat up

**Cure**

INFO:

**Changed new instruction in case of defective boiler, overruling old instruction.**

This instruction doesn't count for the full metal boiler!

To avoid repeat repairs in case a defective boiler was replaced before we updated this instruction.

CURE:

In case the boiler became defect. (heating element has endless high resistance) the boiler + pump need to be replaced.

No matter pump indication /PH always replace both components in the same repair case for such defects.

REMARKS:

26-11-2012: Initial version

01-10-2015 Changed new instruction, overruling old instruction.
