Symptom

New software New Royal machines.

Cure

INFO:
Improvements in the functions and in the languages for the client in New Royal machines.

CURE:
Upload the new software SW V.00.03.07 in the New Royal machines
In detail:
• Added the Steam product in Special Menu Beverage
• Added the Powder Killer improvement (Coffee Powder Waste): now the coffee is poured in to the dreg drawer only after wet
• Added warning Clean Cappuccinatore after 10 minutes from the execution of milk product
• In the double coffee product the machine grind the coffee for the second product while brew the first one.
• Improved Coffee temperature control and flow rate handler to avoid reaching high temperature in products performed very quickly (or double products) at low flow rates.
• Improved Milk temperature control: Changed the estimation of steam boiler temperature, No power for the last 2 sec of product, preload start at 140°C instead 145°C, modified some PID values
• Changed the first phase of descale: now the decaling go also through the brew unit
• Improved the abilitation of water filter: now is possible to abilitate the water filter only through the activation process
• Removed SWISS parameter: now the Ecomode is ON by default
• Added the following new phrases:
CAPPUCCINATORE RINSING
STOP STEAM
YES
NO
START CLEANING
WARNING CLEANING
STOP CLEANING
REPLACE MILK CONTAINER WITH ANOTHER ONE WITH FRESH WATER
• Improved Russian language
