Service information

Reference no.: SDA_96986

Symptom

New sw for Xelsis

Cure

INFO:
New software with changed hardware configuration in standby mode.

CURE:
Upload the new software V.01.05.01
In Detail:
• New standby handler, in order to reduce the power consumption.
• Added two software thermostats to give no power to coffee boiler and steam boiler when its boiler temperature reach respectively 140°C and 160°C.
