Symptom

Dirty of used coffee inside the machine (brew unit: new Slide component)

Cure

INFO:

The consumer complains about the dirty inside the machine:

1. Due to "waste coffee cake" fell between Brew Unit and Dump Box after products have been brewed.
2. Due to un-used coffee powder.

CURE:

1. To prevent the falling of the used coffee cake out of the Dump Box, insert the "Slide" component (code: 996530073322, Image 1) on the brew unit, as indicate in the following instructions:

- Unscrew the 2 screws shown in Image 2
- Insert the slide up to the stop shown in Image 3 and 4
- Re-tighten the 2 screws

2. Some residues of ground coffee under the brewing group are due by Self learning dose (SAS) that will fit in the first period of use of the machine.
