

Philips Consumer Lifestyle

# Service Manual

## PRODUCT INFORMATION

- This product meets the requirements regarding interference suppression on radio and TV.
- After the product has been repaired, it should function properly and has to meet the safety requirements as officially laid down at this moment.

## TECHNICAL INFORMATION

- Colour : Valentine red
- Power consumption : 2000 W
- Suction Power : 340 W
- Noise level : < 82 dBA
- Action radius : 11 mtr
- Cord length : 8 m
- Filtration : Power cyclone  
Hepa 12 Super Clean Air
- Dimensions appliance : 505 x 292 x 292 mm
- Dimensions F-box : 650 x 330 x 310 mm
- Weight : 5.5 kg

## ACCESSORIES

- Nozzle : Tai Chi all purpose nozzle
- Special nozzle : Super parquet nozzle
- Tubes : Metal lacquered 2 pcs. telesc. tube
- Accessories : Crevice nozzle, Small nozzle and Brush
- Accessory storage : Accessory clip on tube
- Coupling : Button coupling

## REPAIR INSTRUCTION

- No specific issues

## OPTIONAL (accessories)

- No specific issues

## DISASSEMBLY- AND RE-ASSEMBLY ADVISE

**FC8768/01**

- To remove the Bucket, unlock the top handle by pushing the button on the lid of Bucket (see picture).

- The button (3) on the lid is a spare part, it can be replaced by removing screw A (see picture).

- The bucket can only be placed back with the lid mounted and positioned in the correct way, otherwise the handle cannot be closed.
- The Inlet filter assy (4) on the front (motor side) of the Bucket can be removed by pulling the lip at the top (see picture).

- The foam in the Inlet filter assy can be cleaned. By pulling the plastic ring the foam filter can be removed without touching the dirt on the filter (see picture).

- The bottom of the Bucket can be removed as shown in the picture below.

**Remark:**

The Bucket can be placed back without the bottom, this will not lead to a safety problem, but all the dust will get into the bottom housing.

## DISASSEMBLY- AND RE-ASSEMBLY ADVISE

- To reach the inner parts for repair, Upper housing (18) has to be removed. First the On/Off button (17) and Cordwinder button (16) must be removed, this can be done with a screwdriver.

### Remark:

The two buttons are secured with 4 “snap locks”, be careful when removing (see picture).

- When lifting at position **b** push the button a little towards the front side.

- When assembling, the buttons can easily be mounted by clicking, start at the side of the handle.

### Remark:

Check that the two springs are in the correct position.

## DISASSEMBLY- AND RE-ASSEMBLY ADVISE

**FC8768/01**

- After removing the two buttons remove the 4 screws **B** at the back and the 5 screws **C** at the front of the Upperhousing (see pictures).
- Screw **D** at the front does not need to be removed, this screw is for ESD and is located in the Lowerhousing.

- To replace the potmeter (9) situated at the bottom of the upperhousing, remove knob (7) on top of the upperhousing and remove the 2 screws **E** at the bottom of the upperhousing (see picture).

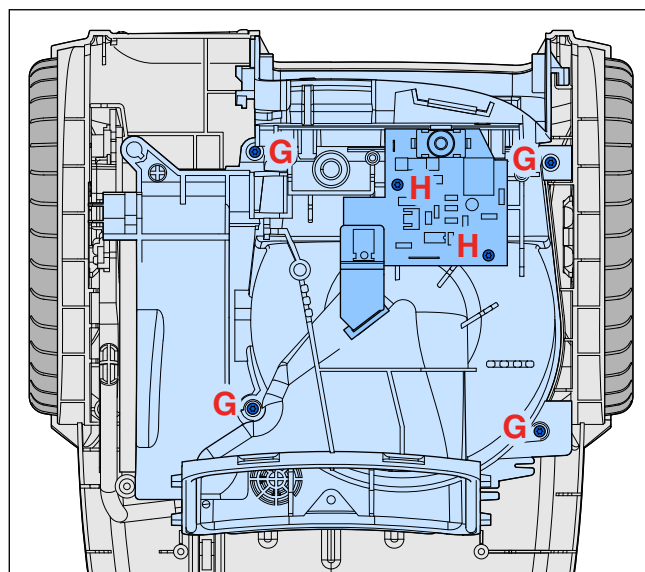

- After removing the Upperhousing, Hose connection (10) and Bucket inlet sealing (13) are accessible. To replace the Hose connection screw **F** has to be removed.

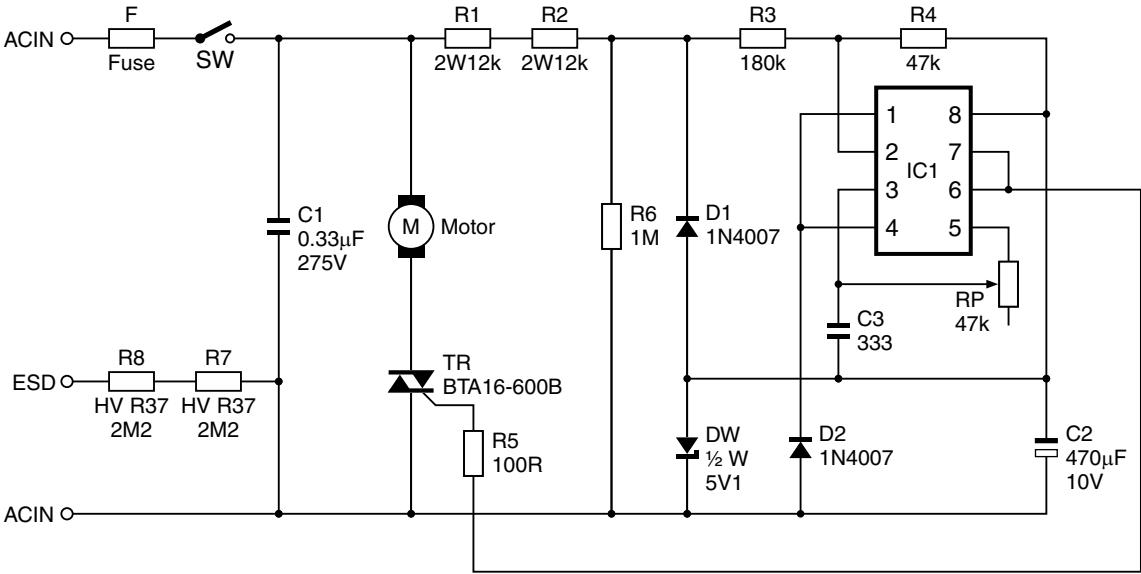

- To replace Cordwinder (24) or Motor (31) Motor housing (28) has to be removed, this can be done by removing the 4 screws **G** (see picture).

**Remark:**

A special long screw driver is needed!

- To replace the PCB (9) remove the 2 short screws **H**.
