

Philips Domestic Appliances and Personal Care

Service Manual

PRODUCT INFORMATION

- This product meets the requirements regarding interference suppression on radio and TV.
- After the product has been repaired, it should function properly and has to meet the safety requirements as officially laid down at this moment.

TECHNICAL INFORMATION

- Colour : Macaw green
- Power consumption : 1800 W
(IEC) 230V
- Maximum Air displacement : 43 l/s
- Vacuum : 300 mbar / 30.0 kPa
- Type number dustbag : FC8021
- Duststorage capacity : 3 L
- Cord length : 7 m
- Filter system : Double layered compatible s-bag™
: 3 layer permanent motor protection filter
: Super Clean Air HEPA12 exhaust filter
- Dimensions of cleaner : 449 x 324 x 250 mm
- Dimensions of packaging : 593 x 393 x 296 mm
- Net weight : 5.7 kg

ACCESSORIES

- Special nozzle : Turbo nozzle
- Nozzle : Tri-Active all purpose nozzle
- Tubes : Metal lacquered telescopic tubes
- Accessories : Brush, crevice nozzle and small nozzle
- Accessory storage : Active accessory storage bridge in handgrip
- Coupling : Button coupling

OPTIONAL (accessories)

- FC 8021 : S-bag Classic
- FC 8022 : S-bag Clinic
- FC 8023 : S-bag Anti-Odour
- FC 8024 : S-bag Long Performance
- FC 8025 : S-fresh scent granules
- FC 8030 : Super Clean Air filter, High-Flow AFS exhaust filter
- FC 8031 : Super Clean Air HEPA filter, HEPA12 exhaust filter

DISASSEMBLY- AND RE-ASSEMBLY ADVISE

- To open the appliance,
First remove the filter cover (item 24) then remove the vario knob button (item 11) with a screwdriver as shown in the picture.

- To remove the button panel (item 13), first loosen mounting screws (A), now by using a screwdriver unlock the 4 snap connection and separate the panel from the housing. (see picture)
- Display cover (item 12) now can easily be removed from the button panel.)
- To remove the motor, you need a torx screwdriver with a 14.5cm long shank. Screwdriver 9965 000 08332 can be used.

ELECTRICAL DIAGRAM

REPAIR INSTRUCTION

- Cotton dustbags, are used in countries in which paper dustbags are not available.
- If the reel half spring unit is replaced, shaft G must be lubricated with **silicone grease**. Do not apply any silicone grease to or spill any grease on terminals (39) or conductors (38).
- Item 37 is provided with a long cord-winder spring, but both long and short cords can be used in combination with this spring. (L = 9.3 m)
- Depending on the original cord, the spare cord must be shortened to the length of the original cord.
- The cord winder spring must be tensioned to the maximum level and then be rewound approx. 1.5 turn
- Item 10, air valve, opens to cool the motor if the air displacement is too low or if the airflow is blocked.
- To adjust the telescopic tube (item 46) to the required length, push the adjustment collar in the direction of the arrow while sliding the top section of the telescopic tube into or out of the lower section.
- If the function of the electronic control unit (item 15) is not required, the Triac must be short-circuited in the manner shown in the circuit diagram.
- When the vacuum cleaner is used to suck up fine dust the pores of the dustbag may become clogged, causing the passage of air through the dustbag to become obstructed. As a result, the dustbag-full indicator will indicate that the dustbag needs to be replaced, even though the dustbag is not full at all.
