## DISASSEMBLY- AND RE-ASSEMBLY ADVISE

- Replacement product

## REPAIR INSTRUCTION

- No specific issues.

### - De-scaling

If the water system is nearly or less clogged by scale then operate the coffeemaker a few times with vinegar or with a 10-15% solution of either vinegar-acid, citric acid or tartar acid, into cold tap water.

**Do not use other de-scaling agents** as these may harm the appliance.

If this procedure does not restore the function, then switch off the coffeemaker when the acid has passed through during approximately 3 min. Keep the appliance in this condition overnight and continue/repeat the cleaning operation.

After the de-scaling procedure, operate the coffeemaker twice with tap water in order to rinse away any residual substances.
